*LIMITED TO 1000 ACCEPTED APPLICATIONS

IN PARTNERSHIP WITH

Rialtas
na hÉireann
Government
of Ireland

Tionscaldal Éireann
Project Ireland
2040

The Irish Government make almost €1.4m available in the Climate Action Fund for Road Transport Operators to invest in new technology.

The Greener HGV Programme

The Greener HGV Programme has just launched. This Irish Government approved initiative is subsidised by the Climate Action Fund as part of Project Ireland 2040. Transport has been identified as one of the sectors that can help Ireland reach its 80% target reduction in CO2 emissions.

Corcra are partnering with the 3 Counties Energy Agency to deliver the Programme which commits to deliver real fuel savings by supplying and installing innovative technology and delivering professional driver training to Irish Fleet companies.

Irish Operators can apply to this program and avail of a grant towards the technology, which when coupled with the development of a professional driving culture will result in a reduction of road diesel usage, and in turn, of the business' carbon footprint. The 10% target for fuel savings will reduce annual fuel bills by €000s.

****Places are limited to the first 1000 vehicles enrolled in the programme****

How Does It Work?

All Telematics technology is provided and installed by Corcra (part of the NIBC Group.) Corcra are a long-established market leader in integrated telematics solutions, supplying thousands of vehicles across Ireland and the UK. Driver behaviour & vehicle performance will be analysed and interpreted into meaningful information to help applicants increase efficiencies. In-cab technology provides the driver with real time interventions which facilitates safe and fuel-efficient driving.

There are 4 key phases to the programme.

1. Installation
2. Benchmarking
3. Driver Training (Classroom based or online)
4. Post training performance review

The Application

The process is straightforward and you can register your interest at www.greenerhgv.ie.

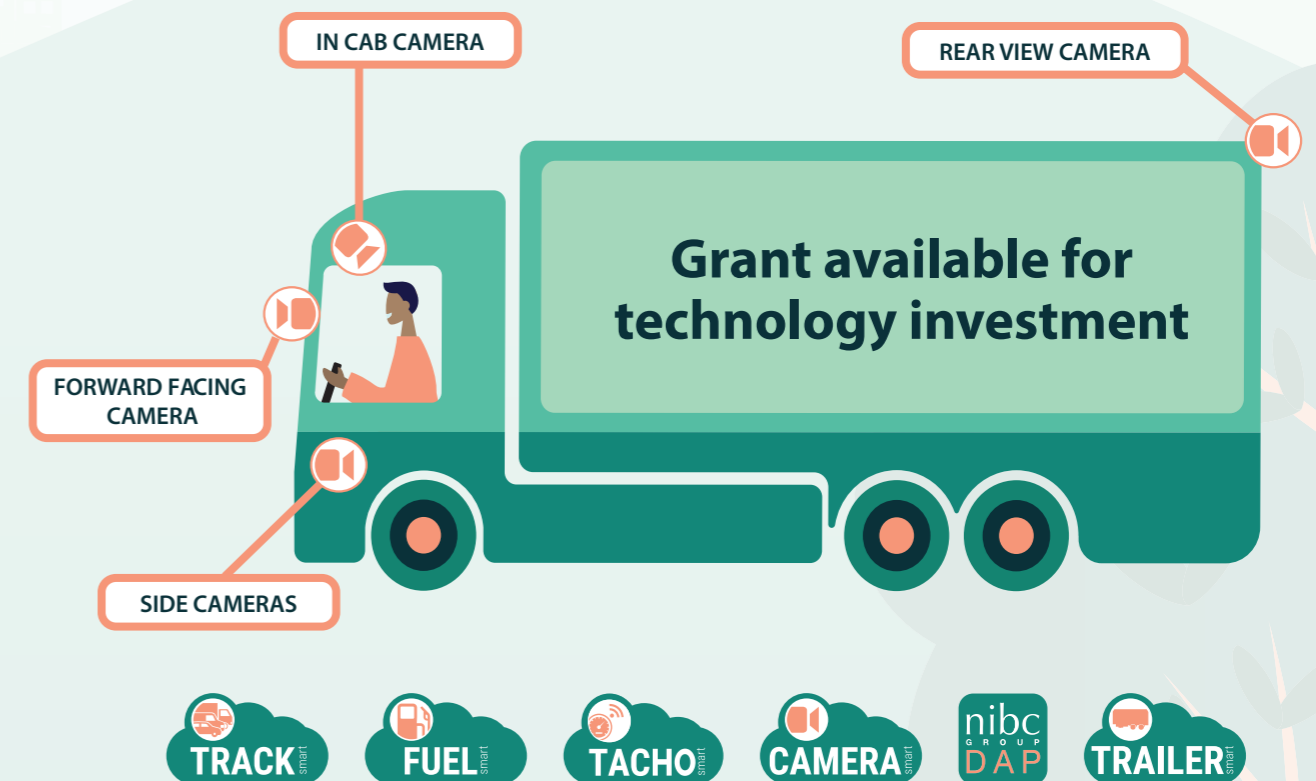

What Do Approved Applicants Get?

Corcra will supply, fit, and give online access to:

Vehicle Tracking, Fuel CAN bus data, Live Footage Cameras, Remote Tachograph Downloads, Driver Awareness Panels.

Professional driver training is also given with the aim to support a professional driving culture which ultimately leads to increased efficiencies.

Costs & Savings

The Greener HGV Programme	Total (over 60-month term)
Cost per vehicle	€4,000
Government Funding available per vehicle	€1,200
Cost to Applicant per vehicle	€2,800
Potential Savings per vehicle	€17,000

* **SAVINGS** are calculated using real life data for a Haulage company, based on 50,000 miles per year with 8mpg and a diesel cost of €1,20/litre over the 60-month term of the programme. Please read the terms and conditions on www.greenerhgv.ie for further details.

Apply Today!

To apply for the Greener HGV programme simply call **00353 1 522 2390** or email info@greenerhgv.ie to contact one of our team of project co-ordinators who will quickly guide you through the application process and get you on the road to a more efficient and cost effective fleet today!

****Places are limited to the first 1000 vehicles enrolled in the programme****
